Starting positions

Passes go between two the jugglers whose positions are highlighted.

This fun moving pattern comes from the inside-out weave (reminder below), but it amounts to constantly changing the feeder, replacing them with the juggler from the big loop. Counts are on a 2-count base.

As you move through the feeder position, you pass 4 two-count throws, the first and fourth are always the same juggler, who starts in the small loop and ends up in the middle. (Feeder passes to small, middle, big, middle.) You move into or out of the feeder position on 4 count, and you move through the weave positions with three 6 count throws.

Mike, Mel, Jeff, and Nathan created this on September 8, 2022, as a variation of:

Inside-Out Weave: feeder (F) passing two count to the six count weavers, who move through small-loop (S), middle (M), and big loop (B).
